🟩 = Supported   🟧 = Downloads   🟥 = Not supported

Note: Your device will stream any files supported by your device application. In order to stream (or download) all the files mentioned above, a different media player (i.e. Quicktime Player, VLC media player, or similar) might be required. In addition, more filetypes might be supported if using a different browser and/or third-party applications. Minimum requirements for streaming: XYFI with firmware 3.0.0 or later.

Note: Your device will open any files supported by your device application. The above indicate the behaviour when trying to open the most popular document file extensions Most document filetypes can be uploaded/downloaded using XYFI. In addition, more filetypes might open if using a different browser and/or third-party applications.
